The screenshot displays the AWS Management Console for the 'eu-north-1' region, specifically the DynamoDB console for the 'Movies' table. The 'Table capacity metrics' section shows 0 bytes for both Read Capacity Units (RCU) and Write Capacity Units (WCU). The 'AWS CloudShell' terminal at the bottom shows a series of 'aws dynamodb put-item' commands being executed. The first three commands fail with 'ResourceNotFoundException' because the table 'Movies' does not exist. The subsequent four commands succeed, adding items for 'The Godfather', 'The Dark Knight', 'Top Gun: Maverick', and 'Pulp Fiction' to the 'Movies' table.

```

[cloudshell-user@ip-10-4-74-20 ~]$ aws dynamodb put-item --table-name Movies --item '{"Title": "The Godfather", "Year": "1972", "Rating": "9.2"}'
An error occurred (ResourceNotFoundException) when calling the PutItem operation: Requested resource not found
[cloudshell-user@ip-10-4-74-28 ~]$ aws dynamodb put-item --table-name Movies --item '{"Title": "The Godfather", "Year": "1972", "Rating": "9.2"}'
